Examples of Funded Projects Across all Companies:

- Continuing medical education (CME) accredited by ACCME or another relevant organization
- Non-accredited CME in compliance with FDA guidelines
- Scientific conferences
- Lecture series or symposia
  - Note: Attendance should be open to professionals in the community. The principal speaker may not be employed by, or the audience limited to, the funded organization
  - Examples of Eligible Recipients: Medical universities, Professional associations, Community health centers, Hospitals and academic medical centers.

All grant submissions must have a Valid Federal Tax ID Number. A U.S. federal tax ID number is required to apply, and if you are a nonprofit organization, proof of status (e.g., a 501(c)(3) IRS letter) is also required. Pharma companies do not make grants to individuals.

Gilead Grants are provided in three categories:

1. **Community and Patient Education**: Community and patient particularly for populations most at risk. Events or resources to educate patients about prevention and care options

2. **Independent Medical Education**: Examples of Eligible Recipients: Hospitals and clinics, Charitable organizations, Professional associations, Patient advocacy and support groups, Academic medical centers and universities

3. **Charitable Support**: Support for a limited number of social service and healthcare-related charitable events in areas of unmet need. Examples of Funded Projects Awards: dinners, Fundraising galas, Local programs, Walk/runs Social service Community initiatives

**JANSSEN**

Janssen Grants are provided in four categories:

1. **Accredited Continuing Education**: Educational programs for healthcare providers such as physicians, nurses, and/or pharmacists that provide continuing education credits.

2. **Non-Accredited Professional Educational Activities**: Educational programs for healthcare providers such as physicians, nurses, and pharmacists that do not provide continuing education credits. As a condition for funding, to the extent Janssen Pharmaceuticals, Inc., products are discussed as part of such funded activities, Janssen...
Pharmaceuticals, Inc., requires that such discussion be done in a manner consistent with the FDA-approved labeling.

3. **Patient Education:** Printed/online educational materials produced for people living with a particular disease or condition.

4. **Fellowships:** Support for *bona fide* fellowship programs at teaching institutions, medical societies and cooperative groups. We may also support travel scholarships for fellows, residents, or healthcare providers in training to attend relevant major medical or scientific conferences for the purpose of education. All support is in agreement with the AMA Council on Ethical and Judicial Affairs Gifts to Physicians from Industry.

Grants should be submitted online:

### Bristol Meyers Squibb (BMS)

BMS Grants are provided in four categories:

1. **BMS Foundation grants:** The Foundation seeks to reduce health disparities in five key areas: cancer in Europe; hepatitis in Asia; HIV/AIDS in Africa; and serious mental illness and type 2 diabetes in the U.S.

2. **Community Grants:** Our company supports non-profit organizations and initiatives in communities where we have facilities and where our employees live and work in the U.S.

3. **Independent medical education:** Grants may be available to support medical education programs, scientific conferences, development of print and online health care publications and other related activities.

4. **Corporate Giving:** We make charitable donations in support of non-profit organizations. We also provide sponsorships, corporate memberships, and other kinds of support.

Grants should be submitted online:

### Boehringer Ingelheim (BI)

Boehringer Ingelheim (BI) Grants are provided in three categories:

1. **Corporate Giving Charitable Donations:** Organizations or associations that are tax exempt under section 501(c)(3) of the Internal Revenue Code can apply for a charitable
donation from the Boehringer Ingelheim Cares Foundation, Inc. The programs must align with the Foundation’s goals to improve access to healthcare for those in need and enhance science and math education while strengthening the communities in which we live and work. Connecticut is the geographic focus of programs the Foundation supports. Funding is not provided for event sponsorships.

2. **Medical Studies Educational Grants:** Medical Educational Grants are independent educational activities that utilize effective educational methods to address unmet medical needs that leads to improved patient outcomes. A Boehringer Ingelheim Pharmaceuticals, Inc. medical educational grant is designed to provide support for accredited educational programs for health care providers and non-accredited educational programs directed toward the patient and the local health care community.

3. **Investigator Initiated Studies (IIS):** BIPI's IIS program is designed to provide support for investigator owned clinical research studies. The program is offered to all academic and community based scientists interested in pursuing unique clinical research and areas of scientific interest to BI. Click the link below for more information on how to submit a clinical research proposal.
